DETAILED ACTION***Election/Restrictions***

1. The amendment filed on 23 March 2005 canceling all claims drawn to the elected invention and presenting only claims drawn to a non-elected invention is non-responsive (MPEP § 821.03). The amendment will not be entered. New claims 19-33 are not readable on the elected invention because they are directed towards a motor filter assembly including, inter alia, a first filter with a “filter first conductive structure comprising a filter first external electrode and a filter first internal conductive structure and a filter second conductive structure comprising a filter second external electrode and a filter second internal conductive structure...” [sic] and further including a “filter shield structure” with a filter shield external electrode connected to a conductive portion of the motor housing. In contrast, original claims 1-18 did not recite a “filter shield structure” or distinguish external and internal electrode and conductive structures, or recite details of the motor housing. Rather, original claim 1 was directed to non-inductive capacitors directly attached to a circuit board comprising powering and ground strip conductors, none of which are recited in the present claims.

Since the above-mentioned amendment appears to be a *bona fide* attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.
